

Byers Vs Seller

another way to trade the

Important Notice

This expert adviser is a very special and only real time trading robot.
You can't make any backtest with it.

It's recommend, that you will test him with demo account before use him in real account.
It works only in real time and will showing you in wich timeframe people make Sell and Buy
position in percent.

In the past month i have pay a lot of money to let make someone a expert advisor with all my
skills and ideas.

Be a part of our ByersVsSellers Thread community and let's get him and us to winners.

What is it and how does it work

First let us look to this picture to the indicator.

We will see different timeframes, Buyers and Sellers each timeframe and trend in color.

Green Color tell us that more byers than sellers make position.

Red Color tell us more sellers than buyers make positions.

Last but not least. Percent each timeframe tell us the different in percent between buyers and
sellers.

	M1	M5	M15	M30	H1	H4	D1
Buyers	24	15	505	591	322	4559	5361
Sellers	2	11	131	45	314	2552	30680
Trend							
	94%	59%	79%	2%	51%	64%	85%

Now let us look to the Expert Advisor Settings in the next picture.

	M1	M5	M15	M30	H1	H4	D1
Buyers	15	206	747	904	501	4812	5325
Sellers	6	134	203	46	449	2613	31030
Trend	71%	60%	79%	22%	53%	65%	85%

another example who it can work
M1 M5 M15 M30 H1 H4

all green - setup trade by percent 60. M30 has no 60% now, but when he arrive 60% and all other still by 60 and more, in your setup all this timeframes true, he will open position. You can combine the timeframes to your own strategie

Spread: 9... Next Bar in 00:49

Preis	Kommission	Swap
The robot can combine the timeframes together. For example. M1, M5 and M30 are true, Trade by percent 80, the robot will open position when all 3 true timeframes have same color and all above 80 percent. That gives us so many kinds of combinations and strategies.
