# Automatic trading robot DarkSlide

Terminal: MT4
Pair: EURUSD, GBPUSD, USDJPY, EURJPY
Timeframe: M5
Type: short-term, scalper.
Average number of deals per week: 60
Deposit: from $ 20

Algorithm:

The adviser works on the micro-level release. Levels are determined by a graphical smart algorithm. It is a scalper with a short take and a stop. It has many additional filters that are optimized at your discretion. Works on a variety of currency pairs. Is dependent on the broker. First of all, you need to consider ecn accounts with reliable brokers.

Settings:

Comment of SET	Comment on the setting.
Magic	Magic orders on this currency pair.
Moneymanagement	Lot calculation block.
Progressive lot	If true, then a progressive lot will be used / if false - a fixed lot will be used.
Lot for 1000 deposits	The setting is used if the value is "true - progressing the lot". Lot will be taken for every 1000 deposit. (for example, the setting is 0.56, and the deposit is $ 350. Lot orders = 350/1000 * 0.56 = 0.196. The order will open with a lot of 0.20.)
Fixed lot	The setting is used if it is set to "false - progressive lot". The order will be opened with the lot specified in this setting.
Opening an order	Settings block for opening orders.
Entry Period	The parameter that affects the sensitivity of the algorithm to the screening of signals. The larger it is, the more signals will be eliminated.
TakeProfit (if 0 - no TP)	Take profit If the setting is zero, there will be no take profit.
StopLoss	Stop Loss.
Escort of order	Order tracking block.
Use the dynamics of spread	Use the dynamics of changes in the spread.
Entry period	Setting affecting the definition of the entry point when using spread dynamics.
Flow correction	Spread flow correction factor using spread dynamics.
Entry period for the statistical method	A setting that affects the definition of an entry point using a static method.
Security	Advanced settings block
Maximum spread	Maximum spread at which orders will be torn off. Note: open orders will be accompanied regardless of the size of the spread.
The expiration of the pending order	Expiration date of pending orders.
