

HOW TO

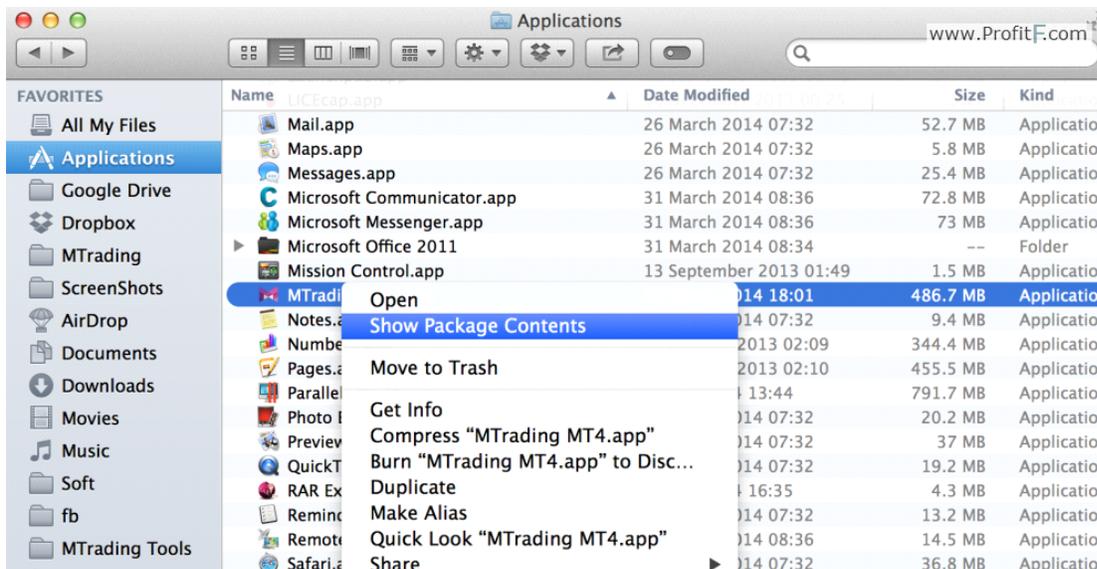

INSTALL INDICATORS ON MAC (APPLE)

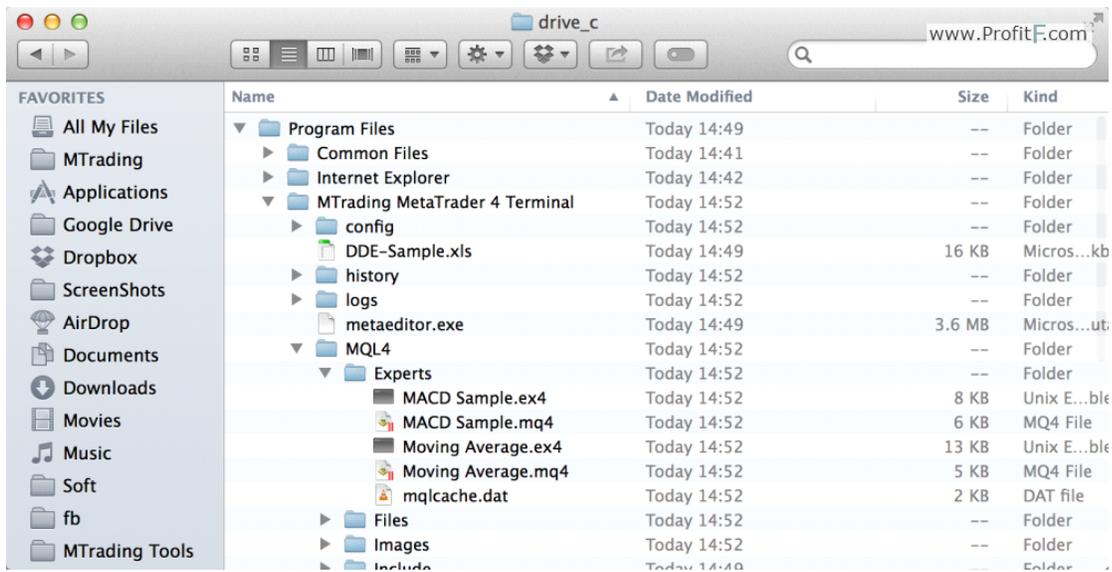

To copy the indicators, simply navigate to the **'Applications'** folder right click on the MT4 application and select **'Show Package'** contents. Then copy/paste your indicators into MT4/indicators folder.

StepByStep instructions:

- 1) Download and save your MT4 files (ex4) on Mac.
- 2) Click **"Finder"**
- 3) Click **"Applications"**. Find the **'MetaTrader for Mac'** => right click on it. (Mtrading in our example)
- 4) Select the **"Show Package Contents"**

- 5) Click **"drive_c" > "Program Files" > "NameOfYourForexbroker MT4" > "MQL4" > "Indicators"**
- 6) Copy your downloaded ex4 files. Indicators (ex4) files should be pasted into **MQL4/Indicators** folder.

7) Close your MT4 platform if it's currently running, reopen it, and you should see your indicators in your Navigator menu.
