

How **M**arket **W**orks? Installation guide

Summary

- Step 1 : MW Indicator
 - Step 2 : Elliot Wave
 - Step 3 : Scanner
 - Step 4 : MW Dashboard
-
- MW MT4 Indicators
 - Contact

INDICATORS FOLDER

Step 1 : MW Indicator

- Select timeframes which should send alerts « Alert_tf = true or false »
- Select timeframes patterns that should be seen on chart « Show_tf = true or false »
- You can leave only patterns on chart when you turn off « Display_Center_Point ». This will deactivate dynamic target zone and neckline
- On your chart, you can see patterns from different timeframes while you set « Show_All_rectangles to true »
- MaxBars limits the number of previous bars to look for past patterns. (reduce number if your platform tends to be slowed)
- « PushMobile_notification » to get signals on MT4 phone
- Leave « Display_CSA » to false
- Leave « Higher_right _shoulder » to false
- Leave other parameters to standard

Step 2 : Elliot Wave

- Drag and drop on chart, nothing to parameter

EXPERTS FOLDER

Step 3 : Scanner

- The scanner automatically changes pairs time by time. You can select your favorite pairs into parameters.
- Set up MW Indi on this chart or any other Indi that sends alerts.
- From now, only 1 chart is running and it scans pairs and monitor market. Each time a pattern is found, alert is sent.

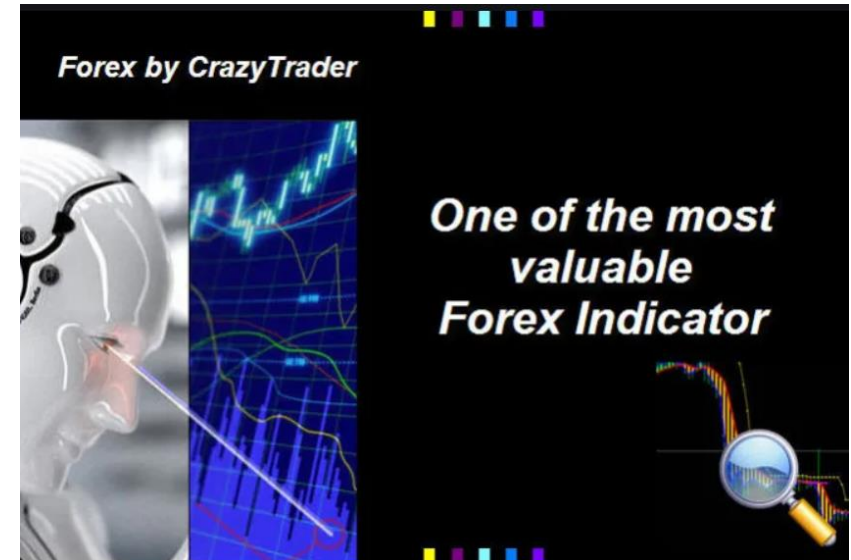

Step 3 : MW Dashboard

- Now the scanner is running, the dashboard is collecting data from the scanner. Each pattern found for the day is displayed into the dashboard.
 - Red = M pattern
 - Blue = W pattern
 - Yellow = Both pattern happened
