System Manual

Risk warning

Before you begin trading on Real account please carefully consider your investment goals, risk and experience you have. It should be noted that Forex is a leverage based market. It should be remembered that leverage can work both in your advantage and disadvantage as well. Therefore there is high risk of losing a part or all of your financial input placed on your account and because of that you should remember to trade with the amount of money which you can lose without taking any influential financial damage.

Scripts	08.05.2018 16:02

- Restart your MT4

- Open your favourite chart. Press the right mouse button and pick FXT50 template depending on your risk appetite.
- FXT50 SCALPING (Provides fastest signals with increased risk and also increased profit potential. Use it for scalping, or fast daytrading).
- FXT50 DAYTRADING (Provides balanced and stable signals. Perfect for most traders. Use it for typical daytrading or swingtrading).
- FXT50 SWINGTRADING (Provides slower but more filtered signals. This is mode is recommended for swing/postion traders, or simply for traders who do not have much time for checking the charts).

SYSTEM OVERVIEW

System contains 4 main indicators:

1. Entry Indicator (BUY / SELL Signals).
2. Dashboard Info (basic data like pair, spread, range, swap etc.)
3. Momentum Analysis Dashboard.
4. Trading Assistant.

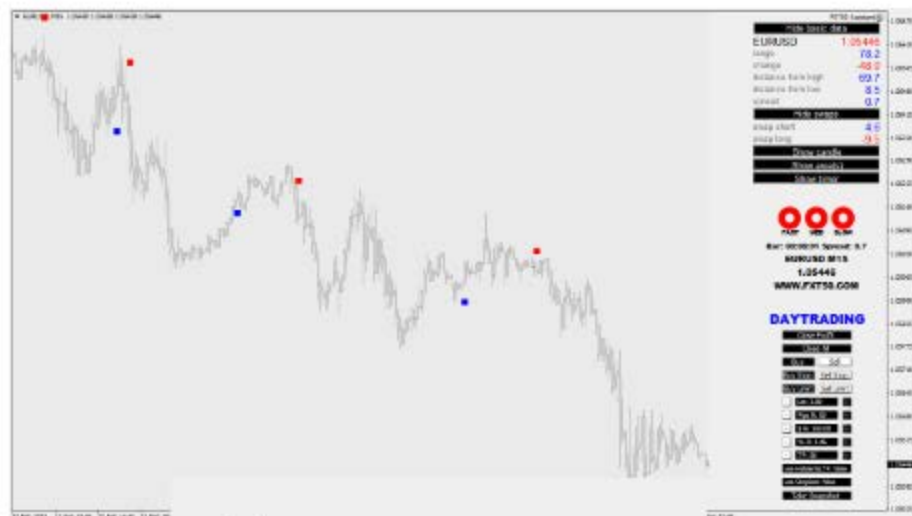

Forex-Shop.Net

ENTRY EXAMPLE (3 DOT - BUY/SELL SIGNALS)

System signals are pretty straightforward. We match the signal (1) with the momentum/trend filter (2).

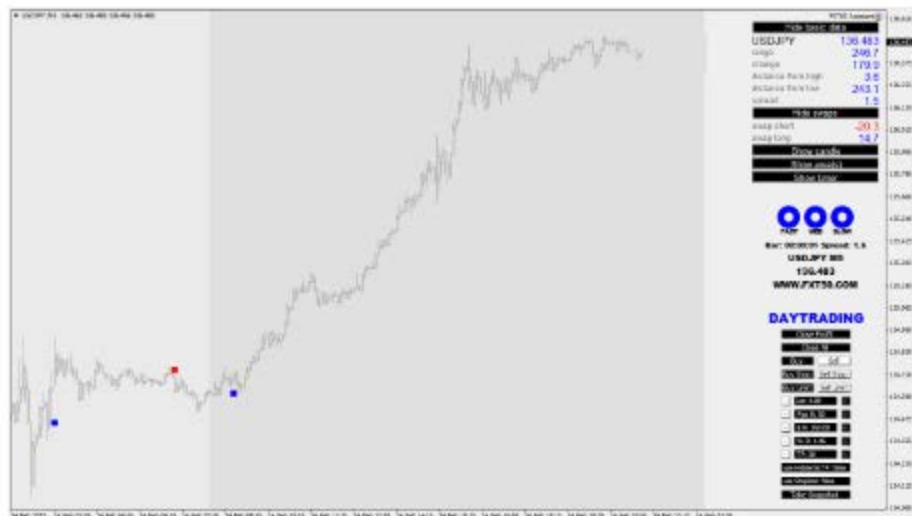

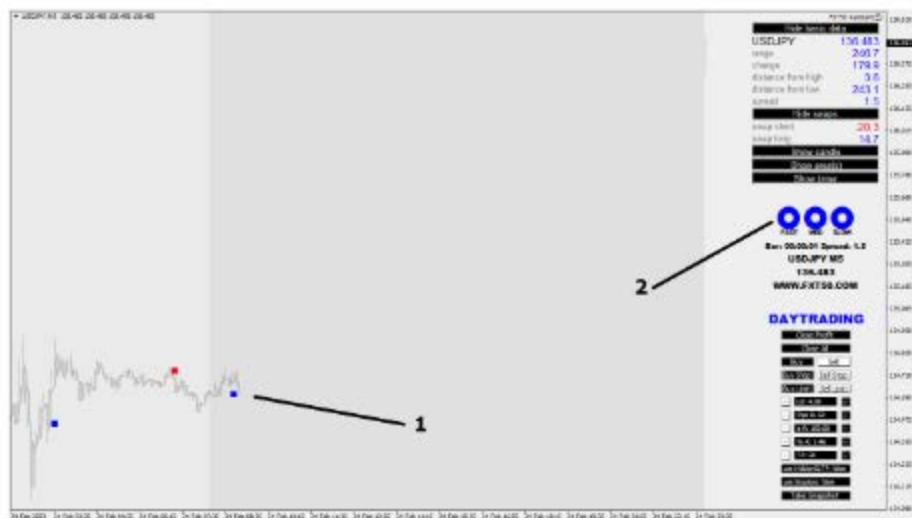

The ideal situation for the signal are 3 x marks that are in line with the signal. (fast/med/slow).

Forex-Shop.Net

#No-Budget Forex-Shop in the Net

Buy signals works pretty much the same way. Combine the buy dot (1) with the momentum/trend filter (2). If we have all three marks blue, the signal is the strongest.

Market Tools

<https://market-tools.net>

<https://it.me/OnlineTradingSolution>

ENTRY EXAMPLE (2 DOT - SIGNALS)

System produces also two DOT signals. Such trades have also profit potential, but it's good to watch it more closely (for example close at $RR = 1:1$).

ENTRY EXAMPLE (1 DOT - SIGNALS)

One DOT signals are the most risky ones. It means, that the signal is against the major flow. Use it for fast scalping only or check another pair for better setup.

STOP LOSS

Stop loss should be placed:

- Below the last swing low for BUY trades
- Above the last swing high for SELL trades

<https://t.me/OnlineTradingSolution>

TAKE PROFIT

Take profit should be placed:

- R:R=1:1 when trading with 1 or 2 DOTS confirmation
- R:R=2:2 when trading with 3 DOTS confirmation.

use Stoploss: false

Take Snapshot

NOTE: Please test it on demo account first, as assistant opens trades based on different settings regarding your account.

Software contains trading assistant that can help you with trading. You can open and close your trades with one click using BUY/SELL/CLOSE buttons.

Lot – determines the lot size when opening a new trade.

Pips R – means stop loss size (in pips). As some traders do not use SL, it's disabled by default (you need only to get into expert settings and and change 'Use Stop Loss to: True' to make it work).

\$ R – means the risk on trade (money wise)

%R – means the risk on the trade based on the account size

TP – determines the take profit in pips.
